EDUCATION

Shri Shankaracharya Institute of Professional Management and Technology

Computer Science in Bachelors of Technology

CGPA: 7.9

Raipur

2022 - 2026

EXPERIENCE

Ilika Greentech Pvt. Ltd. | Full Stack Developer

Raipur, India | June 2026 - Present

- Developed and maintained full-stack sustainability management applications using React.js, Next.js, Node.js, and MongoDB.
- Implemented and enhanced data collection, unit conversion, analytics, dashboards, and reporting modules, integrating frontend interfaces with backend APIs.
- Built scalable features and improved existing application workflows based on business requirements.

Ilika Greentech Pvt. Ltd. | Full Stack Developer Intern

Remote | August 2025 - May 2026

- Contributed to the development of web applications using React.js, Next.js, Node.js, and Tailwind CSS.
- Developed responsive interfaces and implemented application features for sustainability management workflows.
- Collaborated with the development team to debug issues, improve existing features, and deliver new functionality.

UI Designer Solysian Tech Private Limited | UI Designer

Remote | Jun 2025 - Aug 2025

- * Designed **UI/UX interfaces and responsive layouts in Figma**, focusing on visual hierarchy, spacing, consistency, and usability.
- * Created and organized **reusable UI components, layouts, and design elements** to maintain consistency across screens and user flows.
- * Iterated on designs based on stakeholder feedback, refining **user flows, visual elements, and interaction patterns** into polished final designs.

SKILLS

Programming Languages: C, C++, Java, JavaScript, Python

Libraries/Frameworks: React, Bootstrap, Tailwind CSS, Next.js, Node.js, Express.js, REST APIs, JWT

Tools / Platforms: Git, Github, VS code, figma, Postman

Databases: SQL, Supabase, Firebase, MongoDB

PROJECTS / OPEN-SOURCE

Industrial Machinery Management & Maintenance System | [Link](#)

JavaScript, Next.js, Node.js,

Firebase, Render, MongoDB, Tailwind CSS, JWT

- Built a SaaS-based machinery management platform for centralized machine tracking, AMC management, maintenance scheduling, and monitoring.
- Developed dashboard workflows to manage machine records, maintenance activities, AMC details, and operational data.
- Implemented secure application workflows using JWT authentication and integrated frontend components with backend services.

Multi-Industry Business Management Platform (SaaS) | [Link](#)

JavaScript, Next.js, Node.js, Firebase,

Render, REST APIs, MongoDB, JWT

- Built a multi-industry SaaS platform enabling businesses across Gym, Salon, Retail, Restaurant, Manufacturing, and Medical domains to manage daily operations.
- Developed modules for customer management, appointments, inventory, billing, and analytics through a centralized dashboard.

- Integrated REST APIs and backend services to manage business data and application workflows.

Garba Ticket Booking Web App | [Link](#)

Next.js, Node.js, Express, UI Libraries

- Built a full-stack event ticket booking platform using Next.js, Node.js, and Express.js with a mobile-first responsive interface.
- Implemented the ticket booking workflow, including event selection, booking management, and order processing.
- Integrated backend APIs and payment gateway functionality to support secure online ticket transactions.

Ochi | [Link](#)

React, JavaScript, Tailwind CSS, Firebase, Framer Motion, Locomotive Scroll

- Recreated a high-fidelity responsive landing page using React and Tailwind CSS, implementing reusable UI components and modern layouts.
- Implemented scroll-based animations and smooth transitions using Framer Motion and Locomotive Scroll.
